

UREA PRILLED

N 46

EU FERTILISING PRODUCT; PRILLED NITROGEN FERTILISER

STRAIGHT SOLID INORGANIC MACRONUTRIENT FERTILISER PFC 1 C | A | I.

White, surface-treated prilled fertiliser (carbonic acid diamide).

Nutrient content:

- 46% total nitrogen (N)
- 46% urea nitrogen

Granulometry:

- Prills: min 90% 0,5 – 3,5 mm
- max. 3% < 0,5 mm
- 0% over 10 mm

Biuret max 1,0%

Nitrogen fertiliser with a slowly acting form of nitrogen suitable for basic fertilisation before sowing, or additional fertilisation during vegetation to supplement plant nutrition with nitrogen. Especially suitable for fertilising old crops demanding N (corn, root crops, rape).

Application rates:

Winter wheat	Winter rape	Spring wheat	Spring barley	Maize	Sunflower
100-200 kg/ha	100-200 kg/ha	100-200 kg/ha	100-150 kg/ha	100-200 kg/ha	100-200 kg/ha
1-2*	1-2*	1*	1*	1-3*	1-2*

*Number of applications per growing season

Delivery: Loaded in bulk into wagons or vehicles, PE 25kg, big-bag 600 kg, 1000 kg.
