

# DUSLO®

ENERGY OF YOUR GROWTH

## ENSIN® PLUS

is a granular nitrogen fertilizer containing S and nitrification inhibitors dicyandiamide (DCD) and 4-amino-1,2,4-triazole (ATC). Green granules are treated by coating agent. Certified fertilizer.

### N 26% S 13%

#### Nutrients, nitrification inhibitors content and granulometry :

Total nitrogen(N)	26,0%
Ammoniacal nitrogen	18,5%
Nitric nitrogen	7,5%
Water soluble sulphur (S)	13,0%
Dicyandiamide (DCD)	0,36-0,54%
4-amino-1,2,4-triazole (ATC)	0,032-0,048%
Granules (2-5mm)	min. 90, 0%
< 1 mm	max. 1%

Fertilizer with stabilized N and with S content is suitable for late autumn fertilization, spring fertilization, basic fertilization before sowing, or fertilization during growing season on the field for crops demanding S (colza, cereals, sunflower, corns and root crops). Nitrogen is released gradually depending on soil-climatic conditions, which increase its usability and reduce losses by leaching and release into the air.

Package: loaded in bulk into wagons or vehicles, PE 25kg, big-bag 1000 kg, 600 kg
